

J.O.A.D., League and Range Procedures

General Range Safety Rules

1. Shooting begins when no person is forward of the shooting line and the command "SHOOT" is given.
2. Keep arrows in quiver or bow stand until "SHOOT" command; then load.
3. After shooting your arrow, set bow in bow stand (or bow rack, if lines are double shooting) and step back 3 or 4 steps from the shooting line.
4. After everyone has finished shooting and has stepped back from the shooting line, the command "PULL" is given. Walk, don't run, to the target butts.
5. When pulling arrows, stand to the side of the target.
Make sure no one is standing in front of the target.
6. Pick up any grounded or stray arrows and return them to the owner.
7. If you are doubled up with an opposite (left or right handed shooter) simply move stand to opposite side of your lane.
8. If an arrow is dropped, or falls from the arrow rest, in front of the shooting line, leave it on the ground until the "PULL" command is given.
9. Only release the bow string at full draw when there is an arrow on the bow.
10. Always keep arrows either pointed down or pointed toward the target.
11. Make sure no clothing or jewelry will interfere with any part of the string.
